

Expert Certification Application

A Certified Expert is a skilled professional with a deep understanding of the technology, enabling them to advise, consult as a SME, and/or build applications for enterprises and businesses. The Certified Expert has received exhaustive training, and proven their expert-level real-world experience. The Certified Expert credential certifies individuals in the various disciplines from a vendor-neutral perspective.

To obtain the Certified Expert credential, a candidate must demonstrate competency in the discipline of Blockchain Technologies to a review panel of industry-recognized experts. The candidate will be evaluated via an interactive virtual session with the review committee.
